

FEATURES

- Low on-resistance: $r_{DS(on)} = 5\Omega$
- Wide bandwidth: 1.8GHz (–3dB point)
- Crosstalk:
 - 100dB @ 50KHz, –70dB @ 5MHz,
 - 55dB @ 30MHz
- Off-isolation:
 - 70dB @ 50KHz, –45dB @ 5MHz,
 - 40dB @ 30MHz,
- Single 5V supply
- Bi-directional
- TTL compatible control inputs
- Ultra-low quiescent current: $3\mu A$
- Switch turn on time of 6.5ns

APPLICATIONS

- High-speed video signal switching/routing
- HDTV-quality video signal routing
- Audio signal switching/routing
- Data acquisition
- ATE systems
- Telecomm routing
- Token Ring transceivers
- High-speed networking

GENERAL DESCRIPTION

The QS4A110Q is a high-performance CMOS Two-Channel 5PST switch with 3-state outputs. The low on-resistance of the QS4A110Q allows inputs to be connected to outputs with low insertion loss and high bandwidth.

The QS4A110Q with 1.8 GHz bandwidth, makes it ideal for high-performance video signal switching, audio signal switching, and telecomm routing applications. Low power dissipation makes this device ideal for battery operated and remote instrumentation applications.

The QS4A110Q is offered in the QSOP package which has several advantages over conventional packages such as PDIP and SOIC including:

- Reduced signal delays due to denser component packaging on circuit boards
- Reduced system noise due to less pin inductance

Notes:

- Typical values indicate $V_{CC} = 5.0\text{V}$ and $T_A = 25^\circ\text{C}$.
- Guaranteed by design, not subject to production test.
- Measured by voltage drop between A and C pins or B and D pins at indicated current through the switch. On-resistance is determined by the lower of the voltages on the two (A,B or C,D) pins.
- $\Delta r_{DS(on)}$ compares On-resistance at the specified V_{IN} Values.
- The bus switch contributes no group delay other than the RC delay of the on-resistance of the switch and load capacitance. Group delay of the bus switch, when used in a system, is determined by the driving circuit on the driving side of the switch and its interaction with the load on the driven side.
