

# Low Voltage Differential SCSI (LVD) 27 Line Regulator Set

## FEATURES

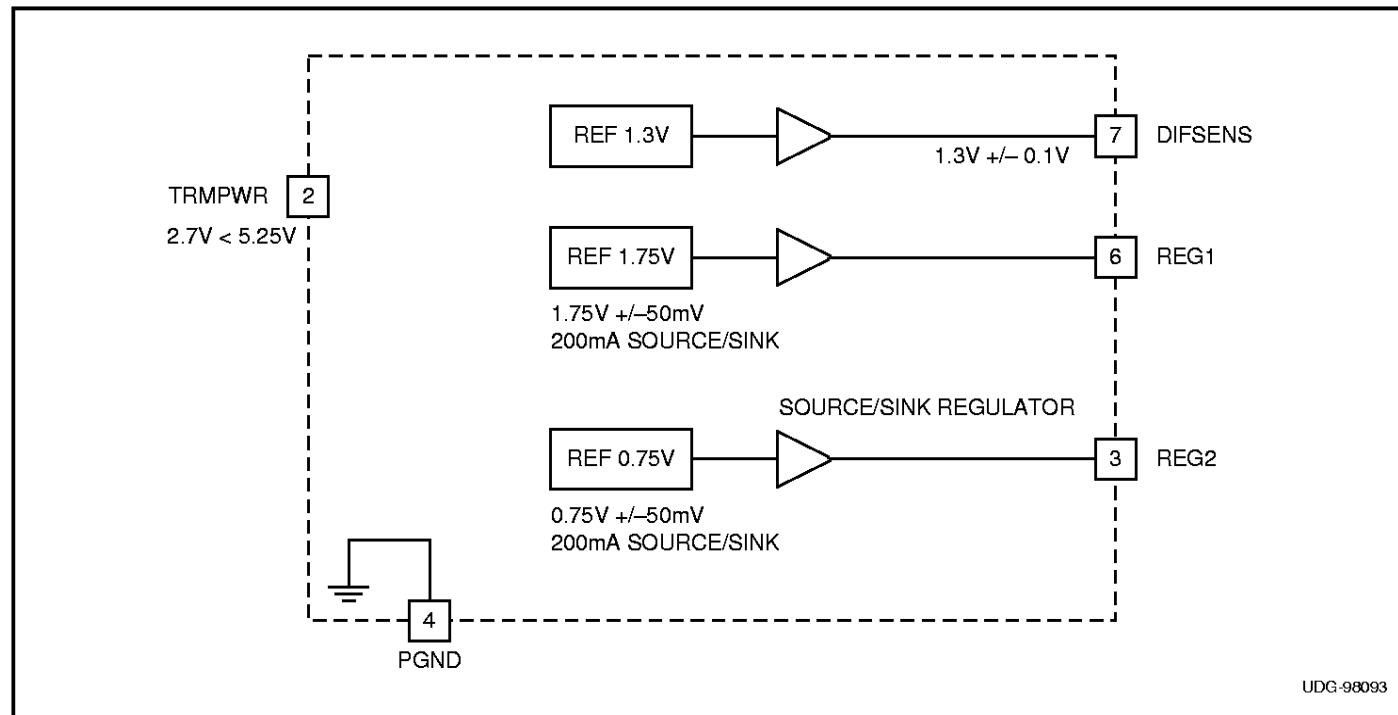

- SCSI SPI-2 LVD SCSI 27 Line Low Voltage Differential Regulator
- 2.7V to 5.25V Operation
- Integrated Regulator Set for LVD SCSI
- Differential Failsafe Bias

## DESCRIPTION

The UCC561 LVD Regulator set is designed to provide the correct references voltages and bias currents for LVD termination resistor networks ( $475\Omega$ ,  $121\Omega$ , and  $475\Omega$ ). The device also provides a 1.3V output for Diff Sense signaling. With the proper resistor network, the UCC561 solution will meet the common mode bias impedance, differential bias, and termination impedance requirements of SPI-2 (Ultra2) and SPI-3 (Ultra3).

This device incorporates into a single monolith, two sink/source reference voltage regulators, a 1.3V buffered output and protection features. The protection features include thermal shut down and active current limiting circuitry. The UCC561 is offered in 16-pin SOIC(DP) package.
